PROFESSIONAL SUMMARY

Senior iOS Engineer with 10+ years of experience designing, developing, and maintaining high-performance native iOS applications using Swift, SwiftUI, UIKit, Combine, and MVVM architecture. Experienced in building scalable, user-centric mobile solutions for millions of users, modernizing legacy codebases, implementing CI/CD pipelines, and leading Agile development teams. Contributed to flagship products including Alaska Airlines, GCash, and BingoPlus/ArenaPlus. In addition to deep iOS expertise, experienced in Android (Kotlin), React, Node.js, TypeScript, GraphQL, and full-stack application development.

PROFESSIONAL EXPERIENCE

Cognizant Technology Solutions Philippines Inc. October 2023 – Present

Sr. Software Engineer II

- Led a high-performance team through the full development lifecycle of the Alaska Airlines iOS app, ensuring Mobile UI Animation quality and design consistency across releases.
- Architected reusable components for the Alaska Airlines React.js project, bridging web platforms with native mobile user experiences.
- Managed the technical transition between native iOS and React-based platforms using TypeScript and Native Modules to maintain performance standards.
- Facilitated technical collaboration between internal engineering teams and external stakeholders to accelerate build releases and ensure project alignment.

AB Leisure Exponent Inc. June 2023 – October 2023

Senior iOS Engineer

- Re-architected a high-traffic mobile platform from the ground up, introducing modern engineering standards and design-forward frameworks.
- Initiated Agile methodology implementation, optimizing project management workflows and reducing development bottlenecks by approximately 25%.
- Acted as Scrum Master for a cross-functional team of 12 professionals overseeing delivery across native and open-source codebases.
- Managed the critical iOS infrastructure for ArenaPlus, maintaining 99.9% application stability and high-performance user interactions.

BlueSky Digital Labs October 2022 – June 2023

Senior Full Stack Engineer

- Engineered modern full-stack applications using Swift, Java, Kotlin, React, and GraphQL to deliver polished cross-platform mobile experiences.
- Modernized legacy codebases with TypeScript and CI/CD pipelines, improving system performance and software scalability.
- Independently led four high-priority projects from design to deployment, including two solo builds with complex mobile integrations.
- Built high-performance mobile interfaces for Hungry Mart (food delivery) and Blissiree (mental health app), focusing on user-centric interaction design.

Collabera PH February 2022 – October 2022

Senior iOS Engineer / Flutter Engineer

- Deployed to UnionDigital to build Pitaka, a cross-platform banking app leveraging Flutter with high-performance native integrations.

- Contributed to the GCash mobile team at Mynt using Swift to develop mission-critical financial features for millions of users.
- Introduced the Input/Output/Types approach of MVVM for iOS development, enhancing codebase testability and developer productivity.
- Adapted the Spotify Agile model to streamline cross-functional mobile engineering delivery.

CODY Web Development / LIG PH May 2020 – February 2022

Senior iOS Developer / Technical Lead

- Served as Technical Lead for the mobile department, architecting engineering standards and providing codebase oversight for iOS, Android, and Flutter teams.
- Led a team of up to 20 mobile professionals, fostering a culture of high performance and design excellence.
- Proposed and implemented an architecture standardization initiative across all cross-platform projects, improving consistency and scalability.
- Spearheaded development of Tocaro, a Slack-like team communication and project management platform, designing responsive UI frameworks for iPhone and iPad.
- Established code review meetings to identify weaknesses and preemptively mitigate user-facing bugs; promoted to Technical Lead within one year.

WeAreChurPhilippines January 2019 – May 2020

Lead iOS / Software Engineer / Head IT

- Translated design concepts into comprehensive iOS app frameworks, delegating components to team members and ensuring quality delivery.
- Promoted to Head IT within a few months; led a mobile development team of three engineers across multiple product launches.
- Key products: Club CHUR (Wi-Fi sharing app), WiFi Pass PH, CHURKit (indoor navigation framework), and VenCHUR (community goods app).

Gorated Innovation Labs August 2017 – January 2019

Web and Mobile Development Engineer

- Developed high-performance iOS applications using Swift and Objective-C, focusing on smooth UI transitions and efficient data handling.
- Implemented CI/CD pipelines using Jenkins to automate build releases across mobile and web platforms.
- Managed and optimized cloud infrastructure on AWS and Azure to support high-performance mobile backends and API design.
- Key projects: McDelivery PH app, DentaSKED dental booking app, Tripkada trip-pooling app, and Facebook Live Game Show.

Freelance June 2014 – April 2017

Web Developer

- Delivered PHP and Laravel web applications and lightweight C# desktop apps for small businesses, managing all aspects of the software development lifecycle.
- Maintained consistent on-time, on-budget delivery across multiple concurrent client projects.

EDUCATION

STI College April 2014 – April 2018

Bachelor of Science in Information Technology

University of the East January 2013 – April 2014

Bachelor of Science in Information Technology (Transferred)

TECHNICAL SKILLS

Mobile Engineering: iOS (Swift, Objective-C), Android (Kotlin, Java), Flutter, Expo, Reanimated, Mobile UI Animation, Native Modules

Web & Full-Stack: React.js, TypeScript, JavaScript, GraphQL, Ruby on Rails, PHP (Laravel), CSS, PostgreSQL

Tools & Methodologies: Git, JIRA, Docker, CI/CD (Jenkins), Agile, Scrum, MVVM Architecture, Code Reviews, API Design, Unit Testing

Platforms & DevOps: Firebase, AWS, Azure, Vercel, PostgreSQL

KEY PROJECTS

Alaska Airlines App — iOS & React.js flight booking, check-in, real-time status, miles management. (Cognizant / Alaska Airlines)

GCash — Philippines' leading e-wallet backed by Globe/Mynt; contributed critical Swift features for millions of users.

BingoPlus & ArenaPlus — Live streaming bingo and casino gaming platforms with real-time betting features. (AB Leisure Exponent)

Pitaka — Cross-platform Flutter e-wallet app for UnionDigital Bank.

Tocaro — Slack-like team communication and project management platform (iOS, iPad-responsive). (CODY / LIG PH)

McDelivery PH — McDonald's Philippines delivery app; spearheaded iOS development. (Gorated Innovation Labs)
